

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (currently amended): An isolated protein having an endoglucanase activity, and derived ~~obtained~~ from a microorganism belonging to genus Staphylotrichum.

2. (currently amended): The isolated protein according to claim 1, having

(A) an ~~encoglucanase~~endogluconase activity, and

(B) the amino acid sequence of SEQ ID NO: 1 at the N-terminus thereof.

3. (currently amended): The isolated protein according to claim 2, having

(A) an encoglucanase activity,

(B) the amino acid sequence of SEQ ID NO: 1 at the N-terminus thereof, and

(C) an average molecular weight of 49 kD, determined by a sodium dodecyl sulfate-polyacrylamide gel electrophoresis.

4. (currently amended): The isolated protein according to claim 2, having

(A) an encoglucanase activity,

(B) the amino acid sequence of SEQ ID NO: 1 at the N-terminus thereof, and

(C) an average molecular weight of 45 kD, determined by a sodium dodecyl sulfate-polyacrylamide gel electrophoresis.

5. (currently amended): The isolated protein according to claim 1, derived from Staphylotrichum coccosporum.

6. (currently amended): An isolated protein selected from the group consisting of:

- (a) a protein comprising the amino acid sequence of SEQ ID NO: 3,
- (b) ~~a modified protein comprising an amino acid sequence in which 1 to 30 amino acids are deleted, substituted, inserted, or added in the amino acid sequence of SEQ ID NO: 3, and having an endoglucanase activity, and~~
- (c) a homologous protein comprising an amino acid sequence having at least an 85% ~~homology identity with that of~~ SEQ ID NO: 3, and having an endoglucanase activity.

7. (withdrawn and currently amended): ~~A polynucleotide~~ An isolated polynucleotide encoding the protein according to ~~claim 1~~ claim 6.

8. (withdrawn and currently amended): ~~A polynucleotide~~ An isolated polynucleotide selected from the group consisting of:

(i) a polynucleotide comprising the nucleotide sequence consisting of nucleotides 64-948 of SEQ ID NO: 2, and

— (ii) ~~a polynucleotide comprising a nucleotide sequence in which one or plural nucleotides are deleted, substituted, inserted, or added in the nucleotide sequence consisting of nucleotides 64-948 of SEQ ID NO: 2, and encoding a protein having an endoglucanase activity, and~~

~~(iii)~~(ii) a polynucleotide hybridizing under stringent conditions to a polynucleotide consisting of the nucleotide sequence consisting of nucleotides 64-948 of SEQ ID NO: 2, and encoding a protein having an endoglucanase activity.

9. **(withdrawn):** An expression vector comprising the polynucleotide according to claim 7.

10. **(withdrawn):** A host cell transformed with the expression vector according to claim 9.

11. **(withdrawn):** The host cell according to claim 10, wherein the host is a yeast or a filamentous fungus.

12. **(withdrawn):** The host cell according to claim 11, wherein the yeast is a microorganism belonging to genus Saccharomyces, Hansenula, or Pichia.

13. **(withdrawn):** The host cell according to claim 11, wherein the filamentous fungus is a microorganism belonging to genus Humicola, Trichoderma, Staphylotrichum, Aspergillus, Fusarium, or Acremonium.

14. **(withdrawn):** The host cell according to claim 13, the filamentous fungus is Humicola insolens or Trichoderma viride.

15. **(withdrawn and currently amended):** A process for producing the protein according to ~~claim 1~~claim 6, comprising the steps of: cultivating a host cell transformed with an expression vector comprising a polynucleotide encoding the protein according to ~~claim 1~~claim 6, and collecting the protein from the host cell or a culture obtained by the cultivation.

16. **(currently amended):** An isolated protein produced by the a process according to claim 15 comprising:  
cultivating a host cell transformed with an expression vector comprising a polynucleotide encoding the protein according to claim 6; and  
collecting the protein from the host cell or a culture obtained by the cultivation.

17. **(previously presented):** A cellulase preparation comprising the protein according to claim 1.

18. **(previously presented):** A detergent composition comprising the protein according to claim 1.

19. **(withdrawn):** A method of treating a cellulose-containing fabric, comprising the step of bringing the cellulose-containing fabric into contact with the protein according to claim 1.

20. **(withdrawn):** A method of reducing fuzzing of a cellulose-containing fabric or reducing a rate of the formation of fuzz, comprising the step of bringing the cellulose-containing fabric into contact with the protein according to claim 1.

21. **(withdrawn):** A method of reducing weight to improve the touch feel and appearance of a cellulose-containing fabric, comprising the step of bringing the cellulose-containing fabric into contact with the protein according to claim 1.

22. **(withdrawn):** A method of color clarification of a colored cellulose-containing fabric, comprising the step of bringing the colored cellulose-containing fabric into contact with the protein according to claim 1.

23. **(withdrawn):** A method of providing a localized color change to a colored cellulose-containing fabric, comprising the step of bringing the colored cellulose-containing fabric into contact with the protein according to claim 1.

24. **(withdrawn):** A method of reducing stiffness of a cellulose-containing fabric or reducing a rate of the formation of stiffness, comprising the step of bringing the cellulose-containing fabric into contact with the protein according to claim 1.

25. **(withdrawn):** The method according to claim 19, wherein the treatment of the fabric is carried out by soaking, washing, or rinsing the fabric.

**26. (withdrawn):** A method of deinking waste paper, comprising the step of treating the waste paper with the protein according to claim 1.

**27. (withdrawn):** A method of improving a water freeness of paper pulp, comprising the step of treating the paper pulp with the protein according to claim 1.

**28. (withdrawn):** A method of improving a digestibility of animal feed, comprising the step of treating a cellulose-containing fabric with the protein according to claim 1.
